

Project Name: EcoRoute

Challenge Track: Track A. Mobility & Smart Cities

Team Members' Names:

- Alibek Abylkasymov
- Ilie Pegza
- Yunus-Emre Eraslan
- Milana Koval

System Architecture

EcoRoute Planner

Calculate how much CO₂ you save by choosing greener transport instead of a car.

Plan your eco trip

Enter origin, destination and your transport mode.

From

48.33763698898522, 14.31645223331833

To

48.30634144669439, 14.286572477842041

Eco transport

Public transport (bus)

Calculate eco route

Route summary

Route Found!

Route: Eco route: 5.15 km using bus instead of a car (routing profile: cycling-regular).

Distance: 5.15 km

CO₂ Saved: 0.62 kg

Points Earned: 61

Coming soon (prototype UI)

These features are part of the planned product. In this MVP, they are just UI elements. Clicking them will show a short notice.

Eco score dashboard

WIP

Compare how "green" different routes are, not only by CO₂ but also by transport mix.

Public transport route explorer

WIP

See detailed journeys with transfers, platforms and estimated ticket prices.

Segment breakdown

WIP

View every leg of your trip: walking, tram, bus, train – all in a single timeline.

Reasonability score

WIP

Balance time, comfort and eco impact in one combined score per route.

EcoRoute streaks & rewards

WIP

Collect points over time, keep daily eco-streaks and unlock achievement badges.

Multi-city planning

WIP

Plan long trips with trains, buses and local mobility in one integrated experience.

The background is a solid light green color. There are two large, solid green circles. One circle is positioned in the lower-left quadrant, and the other is in the upper-right quadrant. They overlap slightly in the center of the image.
